

Environmental Policy Statement

Introduction

This environmental policy provides a framework for monitoring, reviewing, and achieving our objectives, programmes, and targets. Corefield Procurement ensures that its operations are carried out with a commitment to protecting and enhancing the environment so far as it is reasonably practical.

We recognise that our activities have an environmental impact and in developing this policy we seek to confirm our commitment to manage these environmental issues accordingly. All employees receive training to ensure awareness and understanding of the environment and the impact our products and services have on the environment. Our environmental policy is regularly reviewed by management to ensure it remains appropriate and suitable to our business.

Environmental Objectives & Commitments

During Corefield Procurement's operations and within resource constraints, we promise to improve our environmental performance by:

- **Resources** - conserving energy, water, paper and other resources, particularly those which are scarce or non-renewable. Reducing waste through re-use and recycling by using refurbished and recycled products and materials where such alternatives are economical and suitable
- **Environmental Regulations** – Fully comply with all environmental regulations and specify that supply partners & employees comply with the same
- **Communication & Awareness** - communicating openly with staff and supply partners, educating, and motivating our colleagues, and other relevant persons and organisations to encourage them to support our environmental objectives
- **Decision Making** - demonstrating that, where relevant, environmental issues are considered when making decisions, planning, developing policy, programmes, and projects

Approval

This statement was approved on 25.08.2020 by Corefield Procurement's board of Directors who will review and update the policy annually.
